

## ▶ Kibble Adoption Support Services

Kibble Adoption offers some of the highest levels of adoption and training support across Scotland. With a specialist team, you will have access to advanced training, grounded in the latest therapeutic principles. Using a relationship-based approach, training is underpinned by the guiding principle of attachment, and is informed, responsive and reflective of the impact of trauma.

## Bronze Level – Digital Platform

All adopters deserve to have a collective voice and identity at each stage of their journey. To support this, we've developed a tiered digital platform to enable access to our dynamic online learning community. Adoption parents can access e-Learning, webinars, resources and more to support their adoptive journeys and professional development.

## Silver Level – Psychological Assessment

As guided by the Adoption Act, which recognises the right to an assessment of need for children who are adopted / affected by adoption, we provide a trauma-informed assessment for young people and families. This is delivered via our Shared Understanding Model, with the development of a systemic formulation chaired by chartered and registered Psychologists.

## Gold Level - Intervention

By accessing our gold level support, each family will be entitled to a Shared Understanding formulation chaired by a Psychologist. We can provide:

- Therapeutic input in the form of therapies such as play therapy, art and drama therapy
- Systemic Family Therapy
- Dyadic Developmental Psychotherapy (DDP)
- Outreach work/Key worker support for the family
- Disruption support and review
